Bearnormal Activity Is Beary Scary

Written by [HetBear](#) on January 13, 2011 - 7:55 pm

Travis and Julie, an average Midwestern couple, recently moved into a seemingly peaceful new apartment. Unfortunately for them, a "beary" scary entity already resides there — and it's growing for some action!

After some nocturnal visits from an invisible entity Travis starts growing facial hair and reading Bear Magazine. What could be causing this behavior? More importantly, what or who is Travis going to do next?

Bearnormal Activity is a ghostly parody of hairy proportions. The short film was directed by Alejandro Dowling, written & edited by Alejandro Dowling and Bryan Dowling, and produced by Cliff Davis.
